PRESIDENT'S WELCOME

It is a great pleasure to welcome you to Nottingham for our scientific meeting. After so many months of limiting ourselves to online events and meetings, it is especially exciting to meet in person and to have the opportunity to learn together and socialise once more. Despite not being fully unlocked (now not so much face-to-face as mask-to-mask!) we will have the opportunity to discuss and interact in a more enjoyable and productive way.

A focus of this meeting is well-being. This has been inspired not only by the outcome of our strategic review, but also by the difficulties and challenges of the last year. The COVID pandemic has meant that we have lived through an extraordinary upheaval in our professional and personal lives. Some of us have lost those dear to us and we have all seen many of our patients denied the care we would normally give them. I hope that this meeting will both inspire you and equip you with skills and knowledge that will support you as we go forward into a period of recovery.

We are grateful to PLASTA for their support of the meeting and for using their symposium to focus on mentorship. Alexis Hutson, a professional mentor and coach, is leading our mentoring workshops both for PLASTA and the main meeting. She has a long experience of working with doctors and has a crucial insight into the pressures we face. We are also privileged to have Chris Turner, who is a Consultant in Emergency Medicine and the founder of 'Civility Saves Lives'. He will join us to show how stress can negatively impact on the way we react with each other and how we can get to faster, kinder understanding and resolution of difficult situations.

Once again we have outstanding speakers for our eponymous lectures. On Monday, Jason Wong will deliver the King James IV lecture with "Restoring the matrix: from simple cuts to blast injuries". On Tuesday, the John Potter lecture will be delivered by Tim Goodacre and is entitled "Making things better", and later that day Professor Mamoon Rashid will give the McIndoe lecture "Living in interesting times". Finally, on Wednesday, Henk Giele will present his Arris and Gale lecture. I am sure, like me, you will be looking forward to hearing the words of wisdom and experience from these eminent speakers.

Thank you for coming, I wish you an enjoyable and inspiring three days.

Ruth Waters, BAPRAS President

COUNCIL

Officers

Ms R Waters	President
Mr M Henley	Deputy President
Mr U Khan	Honorary Secretary
Mr S Wood	Honorary Treasurer

Council Members

Miss R Agarwal	East Midlands
Mr K Allison	Non-regional
Mr D Mackenzie	South West
Mr M Moses	East of England
Mr P Kalu	Non-regional
Mr S Hettiaratchy	London
Mr P Drew	Wales
Mr J Haeney	Yorkshire and Humberside
Mr W Lam	Scotland
Mr J O'Donoghue	North East
Wg Cdr A Pandya	South Central
Mr A Brown	Northern Ireland
Mr S K Veeramani	South East Coast
Mr S Singh	West Midlands
Mr M Dalal	North West

PROGRAMME OVERVIEW

Monday 28 June

	Conference Theatre	Banqueting Suite B	Conference Suite 1
08:00	Registration and Refreshments		
09:55	President's Welcome		
10:00	Wound Healing		
10:20		PLASTA Symposium	
11:35	King James VI Lecture		
12:15	Lunch Break and Exhibitions		
12:30		SIAG Meeting - mohs	
13:00			SIAG Meeting - Skin cancer
13:30	Professional Values	PLASTA Symposium- Mentoring workshops 1	
15:35	Afternoon Break and Exhibition		
16:00	Skin Cancer - Plenary Session	PLASTA Symposium- Mentoring workshops 2	
16:30	Skin Cancer: Reconstructive tips and tricks		Skin Cancer: How to prepare your trainees for FRCS(Plast) exam
17:30	Close and evening social - Sponsored by PRASIS		

Tuesday 29 June

	Conference Theatre	Banqueting Suite B	Conference Suite 1	Conference Suite 3
08:00	Registration			
08:30	Lipoedema and Liposuction		Free Papers	
09:20	John Potter Lecture

EXHIBITOR LIST

EXHIBITOR INFORMATION

3M

Stand 1

3M connects science, clinical insight and people to find solutions that make better health care possible. From prevention of skin breakdown and managing complex wounds to keeping people free from preventable infections, our unique collaborative culture and engagement with healthcare professionals enables us to develop proven technologies for high quality, cost-effective care.

Our portfolio now includes Advanced Wound Therapy products, which deliver superior clinical outcomes for patients. This includes 3M™ Prevena™ Therapy to manage the environment of closed surgical incisions and surrounding intact skin, in patients at risk of developing post-operative complications such as infection; and also 3M™ AbThera™ Therapy, which is designed to actively remove fluid and help reduce oedema, as well as provide medial tension which helps minimize fascial retraction and loss of domain.

Tissue & Cell Technologies Ltd

Stand 2

Tissue & Cell Technologies (T&CT) is a world leader in the handling, processing and storage of human tissue, particularly adipose (fat) and regenerative tissue and cells. The Company, its team and operations have been engaged in R&D for 20 years, with clinical product development for 15 years and operations at the current facilities for over 12 years. The Company has full QA, is cGMP compliant and has been HTA licensed since 2005. Processed autologous (the patient's own) adipose tissue is mainly used in surgical reconstruction applications, such as breast reconstruction, but demand and awareness are also rapidly growing in the much larger cosmetic/aesthetic market as the high-end, 'natural' alternative to fillers and botox, and is regarded as having regenerative qualities due to the high concentration of stem-cells. It is also increasingly being used as a high quality source of adult stem-cells for novel therapeutic development as well as regenerative treatments, both clinical as well as cosmetic.

T&CT's current product line is 'Adiposet': adipose harvest, processing and storage product for post-cancer, breast reconstruction, mainly to the U.K. NHS and private clinics. The Adiposet product has been clinically approved since 2016 and is currently in use in 25+ U.K. clinics with over 150 women successfully treated since 2014.

Motiva (Gold Sponsor)

Stand 4

At Motiva Implants, women are the #1 priority. That's why we put the latest advancements on medical device technology at their service, ensuring safe, customized and beautiful results.

With Motiva, patients get the widest range of choices for breast augmentation, from shape -we offer Round and Ergonomix - and size, to personalized exclusive procedures like MinimalScar or MotivaHybrid.

Additional to our matrix of breast optimization tools and technology, we've created the Flora tissue expander, designed for women who need to undergo reconstructive surgery.

Our innovations are aimed towards smart, beautiful, safe solutions for all women.

PolyNovo UK Limited (Gold Sponsor)

Stand 5

NovoSorb BTM (Biodegradable Temporising Matrix) is a unique synthetic dermal scaffold that provides an effective reconstructive option for a range of complex wounds.

BTM is indicated for use in the management of wounds including partial and full thickness wounds, pressure ulcers, venous and diabetic ulcers, surgical wounds, trauma wounds, burns, and scar reconstruction.

This unique matrix is composed of a wound-facing biodegradable open cell foam, bonded to a non-biodegradable transparent sealing membrane.

Exhibitor Information

BTM enables the generation of a vascularised neodermis which provides a more robust foundation for wound reconstruction than grafting alone, limiting wound scarring and contracture.

Sebbin UK Ltd

Stand 6

Sebbin has been manufacturing silicone implants for over 35. Our expertise in silicone allows us to offer a complete range of medical devices to meet different needs, as well as a tailored approach of custom-made prosthesis for the reconstruction market. We want you to trust that our commitment to quality is at the core of all our processes. Our vision of the aesthetic and reconstructive surgery market is defined by the responsibility that we share with our partners, surgeons and patients, to empower each person that wishes to change or restore their body, to do so with confidence.

Mercian

Stand 8

Mercian are the UK's leading supplier of precision, high quality Plastic Surgery Instruments including a comprehensive programme of reconstructive micro surgery Instruments.

Quality, precision, specialization and service are the cornerstones of our company philosophy.

Mercian Plastic Surgery and Micro Instruments are the preferred choice of Surgeons and used in the leading centres throughout the UK.

S&T Micro Surgery Instruments are known to Micro Surgeons throughout the world and are globally recognised as leaders in the field of Micro Surgery Instruments & Micro Sutures. Mercian are their exclusive partners in both the UK and Ireland for over 25 years.

We are honoured to sponsor the Guest Speaker Dr Damien Grinsell a leading Australian Plastic Surgeon, his lecture is eagerly awaited.

We will be showing the following:

- Background Material for vessel anastomosis
- Acland Micro Vessel Clamps
- Single use Biover Micro Vessel Clamps
- Super-Fine Micro Surgery Instruments
- Hand Surgery Instruments
- S&T Micro Sutures
- S&T Micro Instrumentation

Contact our highly trained sales team to discuss your Instrumentation requirements.

BFIRST

Stand 14

BFIRST is a UK registered charity which trains surgeons working in the poorest countries in the world, aiming to enable them to undertake reconstructive surgery, releasing children and adults from the state of poverty and destitution associated with disability and deformity. BFIRST is always looking for more BAPRAS members to get involved with its work.

Website: www.bfirst.org.uk

PRASIS

Stand 15

PRASIS is a mutual, run exclusively by Plastic Surgeons for the benefit of the plastic surgical community. It is owned and governed by our members, all of whom are on the GMC Specialist Register for Plastic Surgery. PRASIS is strongly supported by the Chair and Clinical Board of Directors, the latter of which is responsible for the governance and strategy.

PRASIS is the largest community of indemnified Plastic Surgeons. Its sole aim is to protect plastic surgeons, by arranging an indemnity scheme and providing support and guidance to its members. PRASIS membership meets all the requirements of independent sector hospitals and provides the level of protection you need and your patients deserve.

PLASTA

Stand 16

PLASTA UK is the UK's Plastic Surgery Trainee Association. The mission of PLASTA is to ensure that trainees across the country have fair and equal opportunities to maximise their training in order to become well rounded and successful Consultant Plastic Surgeons. The primary aim of our organisation is the continual improvement of Plastic Surgical training in the British Isles. In addition to our advocacy role, PLASTA aims to provide a forum for discussion and advertisement of courses, conferences, educational material and innovative adjuncts to training. Please come and see us at our Stand to learn more about what we can do for you and how you can get involved!

Mentor

Stand 18

Mentor was founded in 1969 and has a long, proud history as a global leader in breast aesthetics. For over 30 years, our company has rooted itself in a commitment to high-quality breast implants, science-based innovations and the best results for patients. We've maintained high standards of design, testing and safety, and we've earned the respect of the breast aesthetics community worldwide for our leadership.

Everything we do is with your patient in mind. We believe innovation should be driven by what patients need and should be backed by science, high design and thorough testing.
