## **PolyNovo UK Limited**

NovoSorb BTM (Biodegradable Temporarily Matrix) is a unique synthetic dermal scaffold that provides an effective reconstructive option for a range of complex wounds.

BTM is indicated for use in the management of wounds including partial and full thickness wounds, pressure ulcers, venous and diabetic ulcers, surgical wounds, trauma wounds, burns, and scar reconstruction. This unique matrix is composed of a wound-facing biodegradable open cell foam, bonded to a non-biodegradable transparent sealing membrane.

BTM enables the generation of a vascularised neodermis which provides a more robust foundation for wound reconstruction than grafting alone, limiting wound scarring and contracture

## MediWound

MediWound Ltd. (Nasdaq: MDWD), a fully integrated biopharmaceutical company bringing innovative therapies to address unmet needs in severe burn and wound management. MediWound's flagship innovative drug, NexoBrid™, is indicated for the removal of eschar in adults with deep partial- and full-thickness thermal burns, a process also known as debridement. NexoBrid™ contains a mixture of enzymes called "concentrate of proteolytic enzymes enriched in bromelain", which is extracted from the stem of the pineapple plant.
