PRESIDENT'S WELCOME

It is my privilege and a great pleasure to welcome you to Monaco for what I anticipate is going to be a stimulating and highly educational 2019 Winter Scientific Meeting.

I am delighted that BAAPS and ESPRAS have joined us and will be making significant contributions to the programme.

BAAPS, who have put together an exciting aesthetic day, incorporating a renowned guest faculty from the UK and beyond, focusing on the latest developments in aesthetic breast, abdominal and facial surgery.

ESPRAS are providing insights into best practice in a broad spectrum of European plastic surgery practice by leaders in their fields. At this time of political uncertainty their engagement is most welcome and I hope will be a stepping stone to ever closer collaboration with our European colleagues in all matters relating to best practice in plastic surgery and especially training.

We are very fortunate to be welcoming other eminent international colleagues who will be benefitting us with their wisdom and expertise.

As an association BAPRAS wishes to support individual members at times of personal and professional challenge. Although significantly constrained by its charitable status I am keen to develop support for surgeons in the workplace and to build our community with the assistance and support of professionals in their fields.

Monaco is a very different venue for our winter meeting albeit similarly priced to London and I hope that you will have a highly educational and very enjoyable experience.
