Aberdeen Cadaveric Hand Trauma Course

23<sup>rd</sup> to 24th of May 2024

www.cadavericsurgicalcourses.com

Our hand trauma course is a highly interactive hands-on course that is structured to meet the needs of surgeons training in Plastic or Orthopaedic Surgery. Participants will learn the surgical techniques for dealing with hand trauma, with emphasis on soft tissue injuries, including tendon repair, flap reconstruction and fracture fixation. The course format includes practical skill sessions using fresh frozen cadavers with well preserved specimens which provide true to life operative experience.

With a faculty to participant ratio of 1:2 this course represents excellent value for money.

# This course is aimed at CT1-ST4 in Plastic & Orthopaedic surgery

The Aberdeen Cadaveric Hand Course is fully accredited by the Royal College of Surgeons of Edinburgh and by BAPRAS.

# Programme

Day 1	
08.30 - 09.00	Registration and Coffee
09.00 - 09.30	Extensor tendons
09.30 - 10.00	Flexor tendons
10.00 - 10.30	Local flaps (finger) part 1
10.30 - 10.35	Pre-dissection instructions
11.00 - 12.30	Dissection session (flexor tendon repair and local
flaps)	
12.30 - 13.15	Lunch Break
13.15 - 13.45	Local Flaps (hand part 2)
13.45 - 14.15	Nerve repair and grafting
14.15 - 14.35	Wide awake hand surgery
14.35 - 14.40	Pre-dissection instructions
14.40 - 17.00	Dissection session
Day 2	
08.00 - 08:30	Coffee
08.30 - 09.00	Compartment syndrome and mangled hand
08.30 - 09.00 09.00 - 09.30	Compartment syndrome and mangled hand Metacarpal fractures
08.30 - 09.00	Compartment syndrome and mangled hand Metacarpal fractures Phalangeal fractures
08.30 - 09.00 09.00 - 09.30	Compartment syndrome and mangled hand Metacarpal fractures Phalangeal fractures Pre-dissection instructions
